'The perfect transformation of that blind world-creating urge into the force of liberation depends on the perfection of inner vision. As long as these forces remain dormant and unperceived within us, we have no access to them. For this reason it is necessary to project them into the realm of the visible in the form of images. The symbols which serve this purpose act like a chemical catalyst, through which a liquid is suddenly converted into solid crystals, thus revealing its true nature and structure.'

Lama Anagarika Govinda

'The secret of true creativity is inner attention, without desire or expectation. It requires us to go into silence and darkness within and draw out what we find there. The mind, with its all too rigid barriers and opinions, often makes it impossible to reach this still, silent place within, leaving us with a distant memory and a longing to regain a paradise once known.'
